DETAILED ACTION

Information Disclosure Statement

1. The submission of the foreign references not considered in the information disclosure statement filed 23 January 2004 fails to comply with 37 CFR 1.98(a)(3) because they do not include a concise explanation of the relevance, as it is presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information, of each patent listed that is not in the English language. The references have been placed in the application file, but the information referred to therein has not been considered. Applicant is advised that the date of any re-submission of any item of information contained in this information disclosure statement or the submission of any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the statement, including all certification requirements for statements under 37 CFR 1.97(e). See MPEP § 609 ¶ C(1).

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 3711

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 3 and 19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 3, last line, "said top surface" lacks a proper antecedent basis.

In claim 19, "said extension portion" lacks a proper antecedent basis.

Claim Rejections - 35 USC § 102 and 103

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the

Art Unit: 3711

art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

6. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary.

Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

7. Claims 1-3, 6, 7, 9, 13, 16, 20 and 22 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent Number 5,470,057 (Bodford, Jr., hereinafter Buford).

Regarding claims 1, 2, 6, 7, 16, Figures 1 and 3 of Bodford show ramps 22a,22b inherently capable of being placed adjacent to a game table net.

Regarding claims 3, 13, 20 and 22, Figure 3 further shows support element 18a,18b.

Regarding claim 9, tabs 20a,20b are broadly considered to be hooks.

Art Unit: 3711

8. Claims 10-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bodford as applied above.

Regarding claim 10, it would have been an obvious matter of design choice to make the Bodford ramps separable, since such a modification would have involved a mere separation of elements. To make an element separable is generally recognized as being within the level of ordinary skill in the art.

Regarding claims 11 and 12, to join the elements together using well-known connecting expedients would be similarly obvious to one of ordinary skill.

Double Patenting

9. Applicant is advised that should claim 6 be found allowable, claim 16 will be objected to under 37 CFR 1.75 as being a substantial duplicate thereof. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim.

See MPEP § 706.03(k).

Art Unit: 3711

Allowable Subject Matter

10. Claims 4, 5, 8, 14, 15, 17, 18 and 21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

11. Claim 19 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

12. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
